PROFESSIONAL EXPERIENCE

SEAT CODE (2023 - PRESENT)

Service Manager & Platform Owner (Jira & Confluence)

- Manage and continuously improve Jira Service Management and Confluence platforms used by 600+ users across 25+ markets
- Ensure SLAs are met, consistently achieving over 95% in response and resolution times
- Work closely with business stakeholders, technical teams and external providers to ensure smooth service delivery
- Identify areas for improvement and implement changes to increase efficiency and user experience
- Design and maintain a centralized service portal (Refined), improving access to support, documentation and services
- Configure workflows, automations, permissions and escalation rules to optimize request and incident management
- Build dashboards and reports (Jira, EazyBI) to track performance and support decision-making
- Create and maintain documentation (Confluence) and deliver training sessions to improve team autonomy
- Develop Python scripts and API integrations (Jira, Akamai) to automate operational tasks and improve efficiency

Technical Rollout Specialist & Technical Support

- Lead and support rollouts of new websites and platforms, ensuring smooth deployments and stable go-lives
- Manage CMS and CDN migrations, reconfiguring over 1000 hostnames and handling DNS-related changes
- Provide L1/L2 support for CMS and CDN issues, coordinating with different teams to resolve incidents quickly
- Support platform stability during releases and migrations, ensuring minimal disruption to users
- Configure CDN (Akamai, Edgio) and manage SSL certificates to ensure performance and availability
- Manage DNS configurations (A, CNAME, TXT, SPF, DKIM, DMARC) and support domain migrations
- Coordinate with identity teams to resolve authentication issues and ensure service continuity

VOLKSWAGEN GROUP SERVICES (2017 - 2023)

Digital Platforms Technical Support (SEAT and CUPRA websites)

- Managed operations and technical delivery of SEAT and CUPRA digital platforms, including websites and car configurators
- Led technical rollouts of new platforms and coordinated deployments across multiple environments
- Configured and optimized CDN (Akamai) and web infrastructure (VHOSTs and sites in AEM)
- Administered the CMS platform (AEM), including user management and content structures
- Provided L1/L2 support, troubleshooting incidents and ensuring fast resolution in line with ITIL practices

Technical Delivery Specialist

- Participated in Agile projects, coordinating stakeholders, documenting architectures and testing APIs
- Optimized SQL queries and supported data-related tasks

SEAT (INTERNSHIP) (2016 - 2017)

IT Governance Support

- Supported IT service management processes (incident, problem, change) following ITIL methodology
- Assisted in project portfolio monitoring and reporting
